OBJECTIVE

Indie Team Unity 6 Developer looking to build creative new experiences working at optimal, professional quality.

EDUCATION

Rochester Institute of Technology | Rochester NY
B.S. in Computer Science | Major: Game Design and Development

TECHNICAL SKILLS

Programming Languages: C#, Typescript, C++, Python, Kotlin, Blueprints, Lau, .Net, HTML, CSS, JavaScript, GD Script
Proficient Tools: Unity, Unreal, OpenGL, Visual Studio 2022/2019, Maya, Blender, Git, Adobe Suite, Godot, Pico-8, Monogame, Excel, Jira, Miro, Trello, Google Suite, Teams, Discord

WORK EXPERIENCE

Our English Inc. | Lead Games System Architect | Remote, Los Angeles, CA **Aug 2025 – Present**

- Built several iOS/Android game projects from prototype to deployment inside **HTML5** and **Unity**, blueprinting out the development timeline for each game and communicating it to leadership
- Interviewed and built the games department to add and encourage the growth of talent resulting in members who help specializing in **pre-prototyping** and **graphics programming**, speeding up work at the start and adding polish at the end

FableVision Studios | 3D Unity Developer | Remote, Boston, MA **Mar 2025 – Aug 2025**

- Developed a custom **3D cutscene tool** using back-end Unity inspector technologies allowing us to develop and deploy 20 voice acted cutscenes in two months.
- Worked with 3d artists to implement in complex **3D Animation Rigs** imported from **Blender** for multiple cutscene characters and built **Animation Trees** inside of **Unity**
- Headed a project to build a mobile application in **Unity GUI** to allow dynamic webpage hosting and backend information gathering

Multiple Locations | Full-Stack Engineer | Unrelated to games **August 2024 – Mar 2025**

Equilibria Systems | Unity Developer | Remote, WI **May 2024 – August 2024**

- Developed an AI-driven language game, serving as a linguistic gamemaster and enhancing decision-making skills for users
- Deployed **Open Chat-GPT 4.0 API** into Unity, creating real-time progress tracking for up to 8 players
- Built a user webpage in **TypeScript** using **ASP.NET back-end** code and Unity SDKs.

Pyramid Lake Games | Online Unity Developer | Remote, WI **Oct 2023 – September 2024**

- Shipped a full **C# Unity** product, *Floor is… What?!,* to work with online cloud services so up to two hundred users could collaborate at the same time
- Managed in the **Photon PUN2 SDK** networking service, also worked with the **ReWired**, **BoingKit**, and **BruteForce APIs** along with basic Unity SDKs

Idol Hell | Unity Devleoper | On-Site Rochester, NY **Aug 2022 – Mar 2023**

- Developed a six-chapter bullet hell game that successfully launched on Steam, achieving a 17.5k Kickstarter campaign
- Built dynamically loading scripts that ran several dozen different equations to create mesmerizing bullet patterns which could be edited in the Unity inspector for design ease
- Helped port over game to Nintendo Switch using the **Switch SDK** and **reduced complex bullet loading time** by a magnitude of 3 to reach a state optimal for the Switch
